Summary

Resourceful and highly organized professional with 6+ years of experience, strong leadership, and team-building abilities. Committed to excelling in my field while fostering a positive and collaborative work environment. Known for being adaptable, dependable, and driven by a strong work ethic. Eager to share knowledge and experience, with excellent communication and critical thinking skills to solve challenges effectively.

Experience

Geodata - Programmer

Koronadal City
May 2019 – July 2021

- Collaborated in the ongoing enhancement of an HRIS, optimizing employee attendance tracking, payroll processing, overtime management, and HR reporting functions.
- Engineered an automated hospital billing system to produce precise Statements of Account, enhancing billing accuracy and timeliness.
- Led the development of an online payment portal, leading a team to integrate multiple payment options, including credit/debit cards and e- wallets like GCash, and Maya.

Land Registration Systems (LARES) – Systems Engineer

Quezon City
July 2021 – January 2023

- Enhanced the eSerbisyo Portal/API to facilitate online requests for Title Details, providing users with real-time status updates and account information.
- Developed a Unified Payment Integration Portal to enable seamless connectivity and transaction processing for various systems through online payments. Developed the DENR Linkage API to support efficient data exchange between parties.

SpaceTech Services - Freelance API Developer

Koronadal City
January 2023 – October 2023

- Developed and enhance an API that will handle all the data needed by the admin web portal and mobile applications. Enhance the existing portal to allow the user monitor all the gross and net transactions and reports needed. Contribute to the development of native applications.

Ascendion - (AXA PHILIPPINES) - .Net Developer

Makati City
October 2023 – May 2025

- Developed and maintained software applications to streamline insurance operations, enhancing efficiency and user experience.
- Troubleshot and resolved complex technical issues, ensuring continuous system availability and reliability.
- Engaged in complete software development lifecycle to meet business objectives.

BOLDR PH – Back-End Engineer
Pasig City
January 2026 – April 2026

- Responsible for designing, developing, and maintaining server-side applications and APIs. Build and optimize business logic, database interactions, and application workflows to ensure seamless and efficient functionality. Collaborate with cross-functional teams to deliver scalable, secure, and high-performance solutions. Key tasks include API development, integration with third-party services.

Education

ACLC College of Marbel
Koronadal City
June 2015 – April 2019

Bachelor of Science in Information Technology

- Exhibits digital literacy with foundational knowledge of computer hardware, operating systems, and networking
